Export Packaging and Shipping

Delivered Anywhere in the World

With our export package, your drum recycling machine is packed in a project-grade mini warehouse (a specially-modified steel shipping container) for shipment and use worldwide. This export package is designed to support reliable operations anywhere. We know that getting spares and replacement parts in if you need them in a hurry can take time, so we'll work with you to outline appropriate consumables and critical spares lists.

For a Proposal: Please be detailed in your request for quotation for consumables and spare parts. Call us to discuss the type of items you may need. Let us know about the site situation, any special circumstances or any specific scope of supply requests.

Scope of Supply - Typical

- Drum Recycler II machine (choose electric voltage & frequency, and burner fuel). Field assembly is required with most of our equipment shipped in a container since we have to remove or dismantle certain components so they fit in the container.
- Steel mini warehouse with cabinets and shelves for the storage of spares and supplies (The machine and all spares and supplies are export-packaged and shipped in this export container).
- Repair manual with parts list.
- Operating manual and instruction CD.
- Typical operational consumables.
- Critical spare parts.
- Optional consumables.

Export Package Description

■ Steel Mini Warehouse

A refurbished steel shipping container specially modified to serve as a warehouse and workshop after the machine and assembly components are removed. Cabinets and shelves for the storage of spares and supplies are welded into the container at the end opposite the doors and along the side walls as afforded by the machine shape. The Drum Recycler machine, and all spares and supplies are export-packaged and shipped in this export container. Wood floor. Size depends on the machine ordered and your

requirements.

■ Consumables, Typical Operating

Items such as these (and depending on the fuel type, etc) may be included in a consumables list to support a typical two year period of operations:

- Hydraulic oil, 2 each 5-gallon plastic containers
- Hydraulic oil filter, 5 ea, spin-on
- Water filter cartridge, 8 ea
- Heater oil filter, 8 ea, spin-on

■ Other consumables

The customer may wish other consumable items to accompany the shipment, as well. Such other items could be:

- Degreaser, alkaline
- Spill sorbent

■ Critical Spare Parts

Critical Spares (those items that would be great to have on hand "just in case") may included:

- | | |
|---|---------------------------------------|
| ▪ Rod end seal and piston ring kit for crush hydraulic cylinder | • Lance rotating motor hydraulic hose |
| ▪ Hydraulic pump rebuild kit | • Crush cylinder down stroke hose |
| ▪ Drum drive push bar, 2 each | • Water pressurizing pump rebuild kit |
| ▪ Drum drive chain, complete, one | • Water heater thermal switch |
| ▪ Drive chain idler sprockets | • Water heater flow switch |
| ▪ 30 gallon drum spacer, 2 ea | • Burner thermocouple |
| ▪ Lance head | • Burner igniter |
| ▪ Lance pressure rinse hose | • Burner fuel pump |
| ▪ Lance drive motor hydraulic hose | • Rinse additive strainer |
| | • Circuit breaker package |

Note: Customer should place an order for any part that is used in the field so the spares inventory is maintained. If the part is under warranty follow the warranty instructions.
